**Amendments to the Claims:**

This listing of claims will replace all prior versions of claims in the application:

**Listing of Claims:**

Please cancel Claim 3 without prejudice. Please add new Independent Claim 23 with the instant Reply.

1. (Original) A disposable adhesive bib comprising:  
a sheet component having an upper edge, a lower edge and first and second edges;  
and  
a wearable component having a front and back surface, with substantially all of the back surface being coated with an adhesive, the wearable component being releasably disposed within an area of the sheet component defined by the upper and lower edges and first and second edges of the sheet component;  
wherein the wearable component is removed from the sheet component and the sheet component is retained for covering an eating surface.
2. (Original) The disposable bib of claim 1, wherein the wearable component includes an upper edge, a lower edge, first and second side edges and a neck cut-out along the upper edge generally midway between the first and second edges.
3. (Canceled).
4. (Original) The disposable bib of claim 1, wherein the wearable component is a separate component from the sheet component.
5. (Original) The disposable bib of claim 1, wherein the sheet component is sized and configured to function as a placemat.

6. (Original) The disposable bib of claim 1, wherein the sheet component is sized and configured to function as a tablecloth.
7. (Original) The disposable bib of claim 1, wherein the sheet component is sized and configured to line and cover at least a portion of high chair tray.
8. (Original) The disposable bib of claim 1, wherein the sheet component is formed of paper.
9. (Currently Amended) ~~A disposable adhesive bib~~ The disposable bib of claim 23, comprising:
  - ~~a sheet component having an upper edge, a lower edge, first and second edges, and front and back surfaces;~~
  - ~~— an adhesive coated on the back surface of the sheet;~~
  - a liner disposed over the adhesive; and
  - a the wearable component having an upper edge, a lower edge, first and second edges, of the wearable component and being a sub-component of the sheet component, said sheet component and said liner together being separable from the wearable component with said sheet component and said liner together being retained for covering the eating surface ~~and being removable from the wearable component and the liner;~~
  - ~~— wherein the sheet component and wearable component are configured to cover at least a portion of an eating surface.~~
10. (Original) The disposable bib of claim 9, wherein the wearable component includes a neck-sized cut-out in the upper edge of the wearable component, positioned approximately midway between the first and second edges and extending toward the lower edge.
11. (Original) The disposable bib of claim 9, wherein the sheet component and liner are configured for entertaining a child.

12. (Currently Amended) ~~the~~ The disposable bib of claim 9 23, wherein the sheet component and the wearable component is formed of a paper/vinyl blend.
13. (Currently Amended) The disposable bib of claim 9 23, wherein the eating surface is a high chair tray.
14. (Currently Amended) The disposable bib of claim 9 23, wherein the sheet component is configured to function as a placemat.
15. (Currently Amended) The disposable bib of claim 9 23, wherein a plurality of the disposable bibs are stacked and packaged together with shrink wrap.
16. (Currently Amended) The disposable bib of claim 9 23, wherein a plurality of disposable bibs are attached along the upper or lower edge of the sheet component with adhesive.
17. (Currently Amended) A tablecloth with integrated disposable bibs comprising:  
a table surface covering component; and  
a wearable component having an upper and lower edge, a first and second side, and a front back surface, wherein the back surface includes an adhesive for releasably securing the wearable component to a wearer, the wearable component being releasably secured to the table surface covering component wherein the wearable component is separated from the table surface covering component, allowing the table surface covering component to be removed from the wearable component and retained for covering an eating surface.
18. (Original) The tablecloth of claim 17, wherein the table surface covering component includes a second surface for releasably securing the wearable component to

Appl. No. 10/671,171

the table surface covering component so that the wearable component may be easily removed and secured to a wearer.

19. (Original) The tablecloth of claim 17, wherein the wearable component includes a neck-sized cut-out in the upper edge of the wearable component, positioned approximately midway between the first and second edges and extending toward the lower edge.

20. (Original) The tablecloth of claim 17, wherein the table surface covering component is configured for entertaining children.

21. (Original) The tablecloth of claim 17, wherein the table surface covering component is pre-cut to a specific dimension.

22. (Original) The tablecloth of claim 17, wherein the table surface covering component includes decorative adhesive stickers for decorating the wearing component and table surface covering component.

Please add new claim 23:

23. (New) A disposable adhesive bib comprising:  
a wearable component having a front and back surface with substantially all of the back surface being coated with an adhesive; and  
an eating surface covering sheet component having an upper edge, a lower edge and first and second edges, the wearable component being releasably disposed within an area of said sheet component defined by the upper and lower edges and first and second edges of said sheet component allowing removal therefrom for separating the wearable component from said sheet component, said sheet component separated from the wearable component being retained for covering an eating surface.
